

Device preview module

SEE HOW YOUR APP WILL WORK

ON ANY DEVICE

This module saves you time and makes it easier to create beautiful preview screenshots for your website, leaflets or APP publication section.

You can see the preview of your app in many different resolutions, horizontally and vertically.

It supports previews for:

- iPhone 6s
- iPhone 7s+
- iPhone 8+
- iPad mini
- iPad Pro 12.9
- Android S8
- Android S8+

- Samsung J7
- Generic laptop

How to use:

- 1.) At any stage of developing your app navigate to Modules -> Device Preview.
- 2.) Click on the type of the operating system or brand of the devices. Select device model and wait for the preview to load.
- 3.) In order to toggle between Vertical and Horizontal position (where available) please click on the "Rotate Screen" button.
