

Editor Links Module – Create Portal inside AMB Editor

App admin are editing app from AMB Editor but they have to go back to other important sites to do some regular work and you lose your customer attention inside AMB Editor.

What if your App Admin don't have to leave AMB App Editor and still access required sites inside editor.

This way they can do what they want without leaving App Editor Dashboard.

Features

1. Add any external link inside AMB App Editor
2. Links can be added per app or for whole platform or both.
3. Easiest way to engage user and let them enjoy AMB App editor
