

App Icon Maker – Create Professional Icon And Startup Images Within Seconds

We all know how difficult and time consuming it is to create unique and good-looking icons and startup images.

If we don't have unique images our App has good chances of getting rejected from App stores.

This module is going to change this.

Now you or your clients can make unique and professional icons in a few clicks without any technical knowledge.

Why This module?

1. Save Time and Money on designer/designing icon
2. Publish App with unique meta data to avoid rejection from App store.
3. Your clients can design what they need, so save time on support
4. Add value to your services by offering creative and professional Icons
5. Optimized icons/images to reduce the size of apk/ipa

Features:

1. Select Any clipart provided by Google material design to have unique look
2. Different Shapes available: circle, rectangle, square etc
3. Change any color combination you need, no compromise on customization
4. Few Effects available to give more attractive and professional look
5. You can type in any text if you don't need clipart in Icon
6. One click save button will replace your icons and startup images with exact size needed for your app.
7. User Roles Supported – control who can use this feature.
8. Translation included
9. It's ready to save your time and take your app business to automation.
